

Essentials Undermount Power

Undermount power provides convenient access to power and charging in a discreet, below-surface design. The concealed installation keeps the surface clear and eliminates the need for a grommet or surface-mounted unit. Two AC outlets and integrated USB-A and USB-C charging support laptops, phones, and standard workstation devices.

Product Highlights

Mounts beneath the worksurface

Affixed to the underside of the surface, keeping power below the work area and out of sight.

No cut-out required

Installs without a grommet or cut-out, so the worksurface stays intact.

Integrated charging

Features dual AC receptacles, USB-A and USB-C ports, including 65W USB-C Power Delivery for fast device charging.

Low profile

Sits tight to the surface, adding minimal depth and preserving knee clearance.

Available finish options

Offered in Black and White to coordinate with a range of furniture finishes.

- 2"H, 2"W, 6"L
- Black or White finish
- 2 simplex, 15A / 125V
